

# WHAT'S AT STAKE

## FOR MILLENNIALS AND GEN Z IN THE 2024 ELECTION?

Let's face it—it's an anxious time for many of us. From the COVID recession and its aftermath, rising costs of housing, education, and childcare, stagnating wages, and the mental health challenges that come with all of this, how can we protect our futures?

We need leaders who will focus on the challenges facing our generation and restoring the American Dream. In Kamala Harris, we have a candidate for President who will.

### HOUSING AFFORDABILITY

Kamala Harris will sign a law stopping big landlords from unfairly hiking rents. For aspiring homeowners, her plan is to build 3 million new homes and provide \$25,000 to new home buyers so they can better compete with the corporate landlords who are trying to monopolize housing.

Trump, however, was found guilty of massive real estate fraud and was sued by the Justice Department for refusing to rent apartments to African Americans.

### STUDENT DEBT

The Biden-Harris administration has cancelled more student debt than any administration in history—almost \$170 billion for nearly 5 million borrowers. They would have cancelled an additional \$430 billion more if it wasn't for Trump-appointed Supreme Court justices blocking a robust loan forgiveness program.

Kamala Harris will continue to fight for student loan forgiveness, in addition to lowering education costs by providing tuition-free education at community colleges and at public universities.

Trump, however, created a fake university and was forced to pay back \$21 million to students he defrauded.

### OUR RIGHTS & FREEDOMS

For the first time in generations, young people today have fewer rights and freedoms than our parents and grandparents. Under Trump, nearly two dozen states severely restricted access to abortion. Protections for LGBTQ people were dismantled. Books were banned from school libraries.

Kamala Harris will fight to restore our freedoms. Trump will continue taking them away.

### WAGES

Inflation is cutting into everyone's wages, but this has been especially hard for younger workers who have little savings to spare. Kamala Harris has committed to raising the federal minimum wage and making it easier for workers to form unions and negotiate higher pay. She will also sign laws to stop price gouging at grocery stores and fight the junk fees that waste our hard-earned money.

Trump's Project 2025, however, would let companies stop paying overtime for many workers, allow states to opt out of federal overtime and minimum wage laws, and take away workers' rights to organize.

### ENVIRONMENT

Today's young people will face the brunt of climate change and its consequences. Making massive investments into clean energy will not only protect our planet, but create millions of good-paying, union jobs. As Senator, Harris co-sponsored the Green New Deal and as VP been a major proponent of cutting US emissions to 50% of 2005 levels by 2030.

Trump, however, dismantled major climate policies to serve the fossil fuel industry and has vowed to halt off-shore wind energy "on day one."
